SPEECH-LANGUAGE PATHOLOGY - Outpatient
11/25/19 @ 0940

S - "Today is a good day" regarding his communication.
O - Veteran was seen for 45 minutes of aphasia treatment.
Auditory Comprehension: Veteran answered yes/no questions about personal/biographical information - 4/10 with several repetitions - increased to 7/10 with MAX cues (including repetitions, re-wording the question and written key words as needed). He identified objects in fields of 4 given gestures - 6/8. He responded appropriately during informal conversations - 10/13 indicating comprehension of SLP's previous statement.

Verbal Expression: Given common objects, Veteran often verbalized the function independently. He named common objects - 3/8 - increased to 4/8 with semantic cues.

Reading Comprehension: Veteran matched pictures of objects with printed words (fields of 2) - 0/3. (He was able to match the same printed words correctly.)

A - Fluent aphasia s/p cerebral infarction affecting all language modalities with severely impaired comprehension. Some improved performance compared to last session.

P - Continue treatment plan.
